EXPERIENCE   **Freelance Web Developer**   Self-Employed
May 2020 to present   Remote
Created from scratch an admin portal solution for the Arts Reach company
(https://artsreach.com)

- Wrote business logic to log appointments made by clients

- Created custom solutions to manage parters of Arts Reach for users of the admin dashboard

Fullstack Student Developer   DevMountain
January 2020 to April 2020   Phoenix, AZ
Developed two fullstack projects while working in a collaborative, learning environment.

- Project #1: Fullstack site that tracks moods of the user is hosted at https://dailymoodtracker.com (https://github.com/jmbaur/mood-tracker)

- Project #2: Fullstack site for collaborative drawing is hosted at http://colorizer.io (https://github.com/jmbaur/colorizer)

IT Technician Contractor   CSAA
September 2019 to January 2020   Glendale, AZ
Provided support for employees with desktop, networking, and other hardware/software related problems

- Used Citrix Xenserver, Active Directory, and LDAP to diagnose employee concerns

- Collaborated with other teams to write shell scripts to solve problems concerning employee security

Data Analyst Intern   Abbott Laboratories
June 2018 to December 2018   Sylmar, CA
Provided valuable insights to the quality engineering team through the use of web scraping tools and data analysis.

- Processed data for malfunctioned products using Excel and VBA macros

- Created a web scraping tool in Python using the BeautifulSoup library

- Automated the web scraping tool using shell scripts and cron jobs in order to scrape, process, and display relevant data

Student Mentor & Campus Recruiter CollegeSpring

January 2016 to January 2017 Los Angeles, CA

Mentored and managed a group of 6 high school students for the SAT and college preparation material on a weekly basis. Recruited future mentors from my college by hosting meetups and participating in club recruitment.

PROJECTS **Mood Tracker Web App**: https://dailymoodtracker.com
